Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 20, 2005 has been entered.

Allowable Subject Matter

Claims 1-35 and 37-40 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-30 and 40 are allowed, because the prior art does not disclose or suggest a layer for a papermakers' fabric comprising a combination of land areas and groove areas, and perforations extending from a top surface to a bottom surface, wherein the land areas, groove areas, and perforations are combined to minimize pattern formation on a paper sheet.

Accordingly, the prior art does not disclose or suggest a method of making the layer.

Claims 31-35 and 37-39 because the prior art does not disclose or suggest a papermakers' press fabric, comprising a layer having land areas oriented substantially in the machine direction, groove areas oriented substantially in the machine direction, and perforations extending from top to bottom, wherein the land areas, groove areas, and perforations are combined to minimize pattern formation on a paper sheet.

The present invention differs from papermaking fabrics having only perforations and designed for removing water without marking the sheet. The present invention also differs from

papermaking fabrics having grooves and perforations designed particularly to form a patterned sheet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed August 24, 2005 have been fully considered.

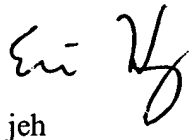

The arguments and amendment to claim 31 have overcome the rejection under 35 U.S.C. 102(e) set forth previously over Watanabe (US 6,514,386). It is recognized that in the press fabric of Watanabe, the lands and grooves are not oriented in the machine direction for the purposes of providing resistance to compression fatigue, and the teachings therein do not suggest any reason for orientating the lands and grooves in the machine direction.
